

## SolJet Pro III XJ-740 FAQs

---

**Q. What is the weight of the XJ-740?**

A. XJ-740 with stand: 225kg (495 lb)

**Q. What colour configurations does the XJ-740 support?**

A. 6 colours mode (=C,M,Y,K,Lc,Lm) and 4 colours mode (=C,M,Y,K,M,C) are selectable

**Q. What is the difference between four colour and six colour modes?**

A. Six colour mode has an advantage in reproducing precise and subtle colours such as human skin or colour gradients it achieves this by using light cyan and light magenta. It is recommended for users who have a wide range of jobs focusing on high quality printing. Four colour mode has an advantage in ink consumption. It is recommended for users who focus on printing outdoor banners

**Q. Is it possible to change colour mode once you installed between six and four colours?**

A. Yes, it is possible, but you have to clean the pump and ink lines by using a special Roland supplied cleaning fluid

**Q. What ink is available with the XJ-640 and XJ-740?**

A. Eco-Sol Max™ ink is exclusive with XJ-640 and XJ-740. It is perfect ink for indoor-outdoor applications as it features several enhancements including faster drying time, higher density, wider colour gamut, improved scratch resistance, lower cost per square foot, virtually odourless, and broader uncoated media support
